Public Health 101

The following collection of technology based **Public Health 101** courses has been developed to assist the public health workforce in locating distance-accessible training programs under this subject. The trainings included in this collection are a subset of trainings developed by the National Network of Public Health Training Centers. All available trainings can be found on the Network's online training database at www.asph.org/phct/search.cfm. The programs in this PH 101 collection address basic principles and core concepts of public health. This collection can assist in selecting a single online training, or to identify a series of programs from basic to more advanced. Most training is distance accessible and free of charge. For more detailed information on these programs, follow the links provided.

Fundamentals of Population Health

Length: 0.5 hours
Format: Video lecture

At the end of this session the learner is able to articulate the concepts of public health and how public health differs from individual health. In addition, the learner will be exposed to the ecological approach to public health and the categories of determinants of health.

Orientation to Public Health

Length: 1.5 hours
Format: Web Course with Activities

Developed for technical and support staff in PH agencies, this course uses the metaphor of a new worker orientation to present information. By reading e-mails, completing assigned tasks, and participating in simulated desktop conferences, the learner discovers that PH is very much a part of everyday life, and learns how many different agencies work to carry out its mission.

Public Health 101

Length: 2 hours
Format: Video Lecture

As a public health professional, you undoubtedly recognize the diverse responsibilities of the field in the 21st century. Public health today is held accountable for many things and the public health infrastructure as it now exists was not always in place. This course identifies the origin of public health in America, traces its evolution, and looks at the current condition of public health. **CEU credit provided**

About the Public Health Training Centers

The Health Resources and Services Administration funded Public Health Training Centers (PHTCs) are partnerships between accredited schools of public health, related academic institutions and public health agencies and organizations. The PHTC Network is designed to improve the Nation's public health system by strengthening the technical, scientific, managerial and leadership competence of current and future public health professionals. Public Health Training Centers assess the learning needs of the public health workforce and provide accessible training in addition to working with organizations to meet other strategic planning, education, and resource needs. Please contact the nearest training center to discuss how we might assist your organization: www.publichealthtrainingcenters.org.
